Are you ready to embark on an incredible intellectual journey? If you're a student who's curious about the grand questions that shape our existence, then this course is perfect for you.

Get ready to explore the captivating history and development of our vast universe, while unraveling the mysteries behind the origins of our species.

In this course, we encourage reasoned predictions of future events and foster

collaboration among students, teachers, scholars, and scientists, creating a vibrant community of thinkers.

By placing human history within the context of the universe's unfolding story, Big History offers a unique perspective that will broaden your horizons.
