A course for students who want to be bilingual! Students will learn to communicate in both spoken and written German. They will practice listening and responding to spoken German and reading and responding to written text. The focus will be on extending their vocabulary to more competently communicate in German with others.

Students will share letters and videos with students from Germany, Austria and Switzerland and create international friendships via online forums. Students will also look at German culture, have a chance to cook and taste German foods, as well as view advertisements and movies in German.

They can also contribute to the planning of a German festival to be held at school.

Students will be assessed on their speaking, writing and understanding of German. This will include making short films in German, writing letters and creative stories, performing scripts and listening to songs and podcasts.

STAGE 6 SUBJECT SELECTION

German (Continuers)
Other Language Courses
